

# QUALITY IMPROVEMENT RESOURCES

ENGAGE. EMPOWER. IMPROVE.

## ACP QI Curriculum Online Interactive Modules

The ACP Advance Quality Improvement (QI) Curriculum offers a practical, step-wise approach to help clinicians engage in quality improvement that is meaningful and puts the clinician in the driver's seat.

This curriculum was developed by physicians for physicians and their clinical teams. It takes clinicians through each stage of the QI journey from establishing the “what” and “why” for change to implementing and sustaining change. The curriculum integrates several core principles key to achieving success including:

- Clinician engagement and ownership
- Team-based care
- Patient and family partnership
- Maximize efficiency while minimizing burden

*Physicians who complete this curriculum are eligible for CME Credit and ABIM MOC points including MOC Part II CME.*

**Access is a benefit of ACP membership.**  
**There is a small fee for nonmembers.**

## ACP Practice Advisor®

Improve your practice's ability to provide high-quality, safe, efficient, effective, and timely patient-centered care with ACP Practice Advisor—accessible, affordable, and adaptable to your practice. Whether you're ready to start down the path to be recognized or accredited as a Patient-Centered Medical Home (PCMH) or just want to make incremental improvements, ACP Practice Advisor has all the tools and resources you'll need.

Using the talents and capabilities of your entire office team, self-paced modules address a wide variety of topics to improve your practice including:

- Building the Foundation
- Improving Clinical Care (many offer CME and MOC)
- Specialty Practice Recognition

Online and collaborative, ACP Practice Advisor helps you transform your practice in easy steps, on your own timeline.

**There is a small annual access charge.**
